notes about Alice

It's hot town summer in the city time again . . . take a drive or walk (it might be faster) down Kalakaua and see what we mean. The guys that drive better have insurance 'cause with all the ladies in distracting bikinis, driving is downright dangerous.

Back a few columns, **Johnny Jones**, manager of the Sand Castle in the Reef Hotel, was saying he'd like to have those weekend jam sessions everyday. Well, he's doing just that starting tomorrow from 3 to 7 p.m. daily. This week **Beowulf** plays the jam on Tuesday and Wednesday, then on Thursday and Friday it's **Goldrush**. The "no name band" is holding down the weekends and it looks like the Sand Castle may be the summer place to go in Wikipiki.

More music on the strip: **Bend**, Hawaii's heavy rock band is doing the off nights at Sweet Marie's. **Sweet Marie** is taking Thursdays off from the club of the same name . . . Why Thursdays? Bassman **Prince Teddy** says they picked Thursday rather than Sunday or Monday because that's when most house bands take off and they would rather stop in to listen to any possible jam with the regular night groups.

Free concert time . . . **Jim Mastros** is producing a show as part of a drama class project this Friday afternoon at Andrews Amphitheatre on the U.H. campus. It starts at 11:30 a.m. with **Auntie Pauline Kekahuna**, **Russell Logan & Beau Evans** and ends at 1:30 p.m. with the **Liko Martin Trio**.

Speaking of Liko Martin, would Liko please contact this column. We received a letter from **Michael H. Goldsen**, head of Criterion Music Corp., a music publisher of such local tunes as "Pearly Shells" and "Tiny Bubbles." Don't laugh. Those tunes made a mint for the writer. Anyway, he'd like to contact you about the many songs you've written.

"The Dirtiest Show In Town" invite came on a dirty piece of white paper . . . opens June 29th at the Forbidden City Theater. This Saturday night is one of the most powerful rock groups going . . . **Jethro Tull**. Last year's show was one of the top of the year and, if anything, Tull has gone up since then. They have the No. 1 album in the U.S., "Thick As A Brick" . . . don't miss 'um at the HIC.

That July 20th **Alice Cooper** concert has been cancelled. It may be rescheduled in September . . . one of the problems, we hear, was that the HIC demanded a bond because the group has caused near riots on the Mainland. Hardly seems necessary in mellow Hawaii . . . eh Matt?

Don't know if you saw the UPI story or not, but Alice Cooper's new album had some U.S. Customs problems because the ladies' paper panties used to wrap the record were confiscated following Federal Trade Commission ruling that the lingerie did not comply with the Flammable Fabric Act. But all were saved by imported panties from Israel that passed inspection.

More concerts . . . **Temptations** again July 21st, and the man his-self, **Isaac Hayes**, July 30th . . . Those UH swap meets are now held at Church of the Crossroads . . . Belated congratulations to the former **Cindy Lorenz** now Mrs. **Robert Coziar** . . . Bob, of course, is head of **Concert One-Stop**.

One of the joys of music held a concert last week at the Waikiki Shell . . . **Joni Mitchell**. One of few artists that needs no back up band, she plays guitar, piano and dulcimer as expertly as she writes and sings. Really nothing more to add except we hope she returns soon. Her concert, by the way, was part benefit and she donated \$5,000 to the Waikiki Drug Clinic . . . nice gesture for one of the nicest ladies around.

Album of the week . . . **Mountain**
